FS9 Users can Download Sydney **Quick Flights** and **QF** Plans in FS9 and FS Nav Flight Plan formats.
 Then look at the README1st file and follow the Easy As 1 2 3 instructions on how to install these flights.
A Quick Flight is for busy or novice Pilots who just want to 'get in the plane and go' regardless of ATC and weather requirements.
 There is no SID or STAR used in these flights.
 When you choose a **QF**, your Flight Sim will start up with correct aircraft at the gate with the correct fuel, passengers and baggage
 You can then start your FS Nav program (if you use it) and choose the **QF** Plan to match your flight.
 FSX and FS Commander options are coming at a later date.
